

## Reports and Data

---

Edgenuity’s learning management system collects and organizes student data to generate a variety of reports available for students, educators, and parents. These reports are available by student, group, course, school, and even for the district as a whole. Standard Edgenuity reports currently available include:

## Single-Student Reports

The following reports are available for an individual student.

### Course Report

The Course Report provides detailed information about all activities assigned to a student in a selected course and is located within a student's gradebook. This report, in PDF format, can easily be downloaded to serve as an assignment calendar for students, especially when a target date is applied to the student's enrollment.

Teachers can view important metrics such as the total number of attempts a student has for each assignment, the estimated time and total time a student took to complete each assignment, as well as the grade and weighted category of assignments.

Additionally, administrators can customize which of the three available grade metrics are displayed on this report.

## Edgenuity Learning Management System: Reports Overview

### Progress Report

For a single student, the course progress report shows percentage completion, activity scores, activity count (total and completed), and the weighting and overall scores by activity type. This report provides a snapshot of the student's progress and achievement in a single course.

Progress reports can be accessed or printed any time for students and teachers. These reports can be emailed directly to parents or guardians, or they can be set up with access to the Family Portal to view them at any time. As students submit assignments, they receive immediate feedback and the progress report is updated in the live system. Since data is recorded and updated in real time, students can monitor their progress and will know exactly where they stand in relation to completing the course on time.

Progress Reports make it easy to identify whether students are on track to complete courses within the allotted timeframe and determine the grade they have earned for submitted work (overall grade), the

grade if they were to leave the class without doing any more work and receive zeros for the incomplete work (relative grade), or the grade in relation to the percentage of coursework completed vs. the percentage of coursework that should have been completed (actual grade).

Visit the Edgenuity Help Center to learn more about the [Progress Report](#).

### Session Log

Teachers and administrators can review the amount of time a student has logged in the system, including the amount of time the student had the system open but was idle. Using date ranges, teachers have a weekly overview of total work in addition to a breakdown of individual session work. The attendance log not only tracks student time on task, but it will also allow teachers to view a student's idle time, which could indicate review time or time spent using the student organizer tools.

With the Family Portal, parents and guardians have unlimited access to the student's attendance log. The attendance data for teachers and families is available at any time.

## Edgenuity Learning Management System: Reports Overview

### Score Overview

The Score Overview allows teachers to monitor student work on a per-course basis. This report not only shows the lesson and activities completed within a course, but it also allows teachers to view the scores, attempts, and submission dates associated with those activities. With sorting and exporting features, teachers can easily assess student progress throughout the duration of the course.

From this report, educators can also see whether any activities require grading. They can view student work from here, review and grade it, and leave feedback for students.

#### Student's Score Overview

This page is used to pull overall grade data for a student's course. Use the course drop-down list to select the student's course. Pick what types of assignments that you would like to view from the Activity Types drop-down list. If you know the date the student submitted an activity, you can enter that data in the time fields. You can leave the time fields blank to pull all assignments, regardless of what time they were taken.

## Group Reports

These reports include data for multiple students, groups of students, or for all students in the school or district.

## Attendance Log

The Attendance Log provides an overview of student attendance, either for the school or for specific groups of students. Teachers can monitor the Attendance Log to view the total time a student spends daily, the number of assessments completed daily, or to monitor the weekly total time for each student.

## Dashboard

The Dashboard feature is a user-friendly way of managing large groups of students from one centralized location. Teachers and Administrators can easily identify and intervene with students who are falling behind or who need additional support. Students who are prevented from progressing in the courses are also easily managed through the alert system, providing teachers with real-time data so they can effectively manage their students. With the wide range of filters available for courses and students, teachers can narrow the list of students that appear in the Dashboard.

## Gradebook

The Edgenuity Gradebook displays test, quiz, or activity scores for an entire class, or for a group that you define. Consistent iconography indicates when a student is out of retakes, has submitted an assignment that requires grading, or has reached an assessment that must be unlocked by a teacher. Educators can easily view and grade assignments, change a score, and reset or bypass an assignment.

The screenshot shows the Edgenuity Gradebook interface for a user named Alan Palmer at Chaparral High School. The interface includes a navigation menu with 'Students', 'Courses', 'Reports', 'Communication', 'Administration', and 'Support'. The main area is titled 'Gradebook' and contains several sections:

- Filters:** 'Subject' (Math), 'Course' (Mathematics 6 - MA3106), and 'Group' (Select Group).
- Navigation:** 'List' tabs for 'Test Scores', 'Quiz Scores', and 'Activities'. 'Unit' (Relationships on the Coordinate Plane) and 'Lesson' (Distance between Two Points) dropdowns.
- Summary Table:** Columns for 'Student Name', 'Overall Progress', 'Overall Grade', 'Overall Active Time', 'Last Activity', 'Warm Up', 'Instruction', 'Summary', 'Assignment', and 'Quiz'.

Numbered callouts (1-8) point to specific elements: 1 (gear icon), 2 (Subject dropdown), 3 (List tabs), 4 (Student Name column), 5 (Overall Progress column), 6 (Overall Grade/Active Time/Last Activity columns), 7 (Unit/Lesson dropdowns), and 8 (a cell in the Assignment column).

- 1 Click the gear icon to choose the course-level columns you want to see. Show or hide Overall Grade, Relative Grade, Actual Grade, Active Time, or Last Activity.
- 2 Select the subject and course you want to manage. Optionally, select one or more Groups.
- 3 Navigate between units, topics, and lessons to control the level of detail displayed in the Gradebook. Select Test Scores to see only test scores for the entire course, Quiz Scores to view only quiz scores, and Activities to view every activity score.
- 4 View the class list and click on any student to see their individual gradebook in more detail.
- 5 View overall course progress as compared to target progress to monitor whether students on track for on-time completion.
- 6 View course-level metrics such as course grade, total amount of time spent in the course so far, and how many days it's been since students submitted an activity in the course.
- 7 View the structure of the selected unit, topic, or lesson.
- 8 View scores, alerts, and status indicators. Click on any cell to take action on that activity.

### Group Progress Report

This report allows educators to monitor the performance and progress of multiple students at one time. The progress overview demonstrates the currently available information about a group of students. The administrator at the school level will be able to view the reports for students enrolled at the site; district administrators will be able to view information for all students in all schools in the district as they navigate from school to school.

### Lesson Mastery Report

The Lesson Mastery report provides an at-a-glance view of how students are performing in all the lessons in a course, in order to identify and group students for re-teaching. For each lesson, educators can view how many students are struggling with the lesson, how many are active in the lesson, and a number of other statistics. The report can be filtered by standard, and it can be sorted by lesson difficulty or any other of the columns displayed. Educators can drill into any lesson to view which students are struggling and/or active, with visibility into the assessment questions and individual student responses for targeted, real-time intervention.

## School and District Reports

These reports summarize student and teacher data at the school or district level, and are intended for administrators.

### Recent Actions Log

Searchable by student, teacher, action, or date, the Recent Actions Log is an important tool that enables teachers and administrators to monitor the system for updates to accounts and courses.

For example, administrators can review how often grades have been changed by teachers, how many times students have been given a bypass for an assignment or test, and whether new users have been added. Through this report, administrators can monitor teachers to ensure district policies for actions such as changing grades or assigning courses are followed.

#### Recent Actions Log

This page lists recent actions taken by instructors and administrators. It includes records for items such as changed grades, and added users. Click an item from the actions list below to view information about that action.

### Course % Complete

This report allows administrators to summarize percentage completion by decile, by school. For example, in the report below there are two students at Main Street Middle School who have completed between 0 and 9.99% of their coursework. There are three students at that school within 10% of completing their coursework.

## Family Portal

Parents and guardians have 24/7 access to Edgenuity’s Family Portal, where they can log in to view their child’s attendance log and progress report. If desired, teachers can even set up daily, weekly, or monthly emails for parents or guardians (or tutors, court officers, mentors, or other adults with appropriate permission to view student data). When this feature is enabled, parents and guardians will receive regular updates on student progress and activity.

## Administrative Report Subscriptions

Edgenuity’s Account Management team has access to specialized reports that provide additional data metrics for our customer partners. These reports can be delivered ad hoc upon request, or an administrator can request that Edgenuity configure reports to be automatically delivered on a daily, weekly, or monthly schedule. Reports will be emailed via Secure Message, where permissioned administrators can download them on demand.

## Action Log

This report displays all the educator actions in the LMS that affect students. You can use the Action Log to find specific instances of things such as activities bypassed, assignments reset, or scores changed. You can also use the Action Log to run periodic audits of teacher activity overall.

The Action Log report can be used to determine whether teachers are following various district policies on Edgenuity system usage.

## Attendance Log Reports

The attendance reports shows student time for each day within the report timeframe. The Attendance Log Raw Data Report shows student home and course school, grade level, and IDs. It includes session time, active time, idle time, along with a count of activities attempted and completed. Because active time is associated with an enrollment, course information, such as series, subject, teacher, status, enrollment ID, and course name are included on rows that display active time.

The Attendance Log Summary Report contains four summaries of the Attendance Log Raw Data report, each on a separate tab, displaying the data in different ways. They show school, student, and course name where applicable, along with times per day. Some worksheets include data regarding how many activities were attempted and completed. See the specific worksheet information below for more details. If a student did not log into the system during any date within the timeframe, the student will still appear on the report for that date with zero time displayed.

## Gradebook Activities

This report shows students' active course time, which is the elapsed time from launching an activity to leaving the activity via Submit or Save and Exit. The report displays a daily active time summary per student, as well as the start and end times and duration for each activity, as well as earned activity scores.

The Gradebook Activities report can be used to help administrators review and correlate daily time-on-task (active time) with activities completed and activity scores.

## Progress Snapshot As Of

Progress Snapshot As Of report includes enrollment data as of a specific date in the past, which can be used in multiple ways, such as to compare to current data to understand changes in time, progress, and grades.

## Edgenuity Learning Management System: Reports Overview

Because data in the Manage Enrollments is always live (cumulative data that is updated with every change), educators are not able to see what the data was on a past date.

The Progress Snapshot As Of report pulls enrollment data that reflects the data (active time, progress, overall grade, actual grade, relative grade) on a past date.

Snapshot data can be compared to the current data to understand changes in active time, progress, and grade, or to understand where students were at a certain point in the past (e.g., end of a grading period, or a district-wide school shutdown).

**NOTE: The User Sessions Log does not report on time spent in course activities. To see this data, use the Activity Completion report or Gradebook Activities report.**

The user session log is also available in a "Lite" version (User Session Log Lite), which contains all the same information, but without the IP Detail column.
