

Family Support for Imagine Galileo

Be a part of your student's learning journey

● Imagine Galileo Login Portal

GET STARTED!

Your student will log in to [Imagine Galileo](#)* using the username and password or the QR code their school provided.

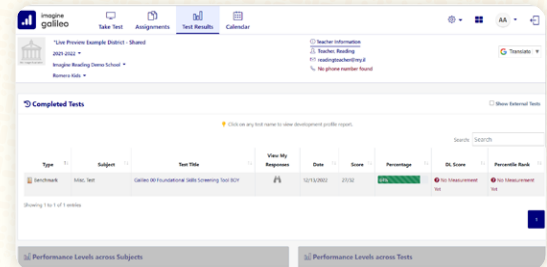

If your district uses a single sign-on (SSO) portal, like Clever or Classlink, follow the instructions from your student's teacher.

Now you're ready to make the most of the following tips to support your student.

Help your student thrive in their learning

EXPLORING THE STUDENT-FAMILY RESOURCE CENTER

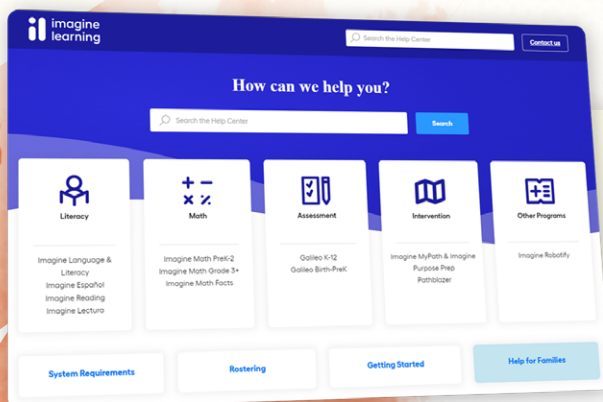

The Imagine Galileo K-12 Student-Family Resource Center is a secure area where students and families can access current information about their assessment performance, including benchmark tests and teacher-created exams. Use it to view your student's tests in detailed reports.

● Student-Family Resource Center

MAKE TEST-TAKING A REWARDING EXPERIENCE

An initial assessment will help us learn what students already know and what they may not yet know, equipping us to adjust our instruction accordingly. The first test of the year will also help us know your student's starting point on their path of grade-level learning: as the school year unfolds, we'll be able to reference this point and track your student's growth.

Connecting with your student's teacher

Communicating with your student's teacher builds a support team that helps everyone succeed. They may suggest additional at-home activities if your student struggles with a concept or needs extra encouragement and they're available if you have any questions.

Create a way for your student to excel at home

Support and encouragement will be important if your student is scheduled to complete their benchmark test at home. Here are some tips for giving them the best experience:

- Create a comfortable, distraction-free space as a work area
- Establish a 'focus time' to help them connect and make progress
- Support your student in accessing the test, but do not explain items or help them answer the questions

Why Imagine Galileo?

Imagine Galileo assessments are backed by research to build skills needed for state testing. These standards-aligned and research-based tests provide insight into overall student abilities. The benchmarks are comprehensive, and each measures a wide sampling of the grade-level standards your student will be taught during the school year. The test results guide your student's classroom teacher in instruction and intervention.
