

Family Support for Imagine Reading

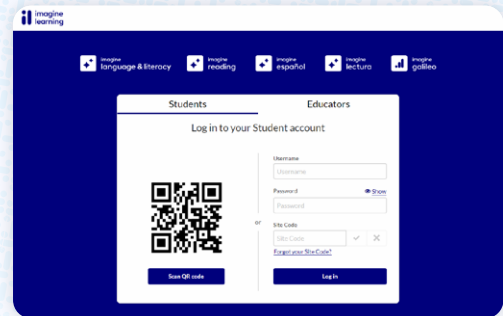

Be a part of your student's learning journey

GET STARTED!

Help your student log in to [Imagine Reading here](#)* with the assigned username and password or the site code provided by their school.

If your district uses a single sign-on (SSO) portal, follow the instructions from your student's teacher.

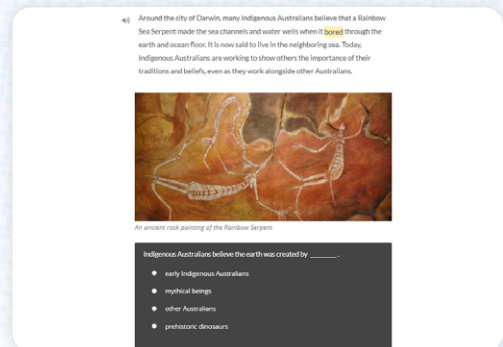

Now you're ready to make the most of the following tips to support your student.

● Imagine Reading Login Portal

WHAT TO EXPECT IN IMAGINE READING

You'll be able to explore your student's library of grade-level reading units, each with different texts focused on a specific topic. Students answer questions about the text while they read (or listen), and answers are either graded immediately (multiple choice questions, for example) or sent to their teacher for grading ('free response' questions).

● Imagine Reading Lesson

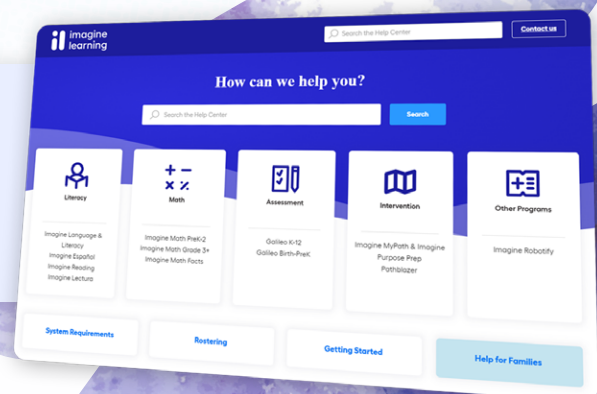

Why Imagine Reading?

Learning to read is key to academic success and college and career readiness. Unfortunately, results from the National Assessment of Education Progress (NAEP) show that only 35% of fourth-grade and 34% of eighth-grade students meet the NAEP proficient level in reading (U.S. Department of Education, 2019).

Imagine Reading is both research-based and proven to work in the classroom. The program meets students where they are and puts effective instruction into action. As your student works through the texts, their reading, speaking, and writing abilities will improve, preparing them for college and their career.

Help your student reach their potential

Stay connected to your student's teacher

Communication with your student's teacher is vital to success. They can tell you which unit and text your student should start on and review their progress with you throughout the year. You can discuss your student's growth, test results, expectations, and struggles. Reach out to the teacher if you have any questions about the course or if your student is:

- Having a hard time with a concept
- Falling behind in their reading
- Finding the work is too easy, lacking challenge

How to help your student thrive in their learning

At-home support and encouragement make a huge difference. Try these tips to help your student be an active, engaged learner:

- Choose a comfortable, distraction-free space as a work area for your student
- Create a plan, such as 'focus time' and 'break time,' to help them connect and succeed
- Make sure your student has access to Wi-Fi and a charged device, such as a laptop, tablet, or smartphone
- Show interest by asking your student what they're reading and what ideas or questions they have about the texts. This will help reinforce the concepts and skills they're learning in school.
